

## STOPSEL Cleansing Concentrate

### Description

STOPSEL removes salt and protects your boat and equipment against rust and corrosion caused by salt, sea water and sea air.

STOPSEL is biodegradable, nontoxic and can be used on all surfaces. The exclusive corrosion inhibitor leaves a protective film preventing future damages.

Weber Motor recommends a regularly flushing of the engine's seawater cooling system as well as the jet propulsion system with STOPSEL cleansing concentrate.

STOPSEL AUTOMIX is to be installed at your boat's flushing device and ensures an appropriate application rate during the flushing process.
